

AI-Powered Lead Generation System

-Prepared by

Minu Antony

Course Domain:

Salesforce Certified Administrator with AI Agentforce Specialization

Project Description:

The AI-Powered Lead Generation System is a Salesforce-based application that automatically identifies potential leads by analyzing customer data, website activity, and other business inputs. Using AI and Agentforce, it predicts which leads are most likely to convert, prioritizes them, and generates alerts or suggestions for sales reps.

Key Features:

- Capture and organize potential leads from multiple sources.
- Use AI to score leads based on likelihood to convert.
- Send alerts for high-priority leads.
- Suggest next actions to sales reps to improve conversion.

Skills Students Will Gain:

- Salesforce Lead Management (Leads, Lead Scoring, and Lead Alerts)
- AI-driven Lead Insights using Agentforce
- Lead Qualification, Assignment, and Automation
- Salesforce App, Object, and Tab Configuration
- User Profiles, Roles, and Access Management
- Validation Rules and Business Process Automation

System Requirements

Software:

- Salesforce Developer Org (free)
- Google Chrome + Lightning Studio (for LWC dev)

Hardware:

- 8 GB RAM, 20 GB free disk, i5 / Ryzen 5 or equivalent

Purpose Statement:

The purpose of the AI-Powered Lead Generation System is to help sales teams identify, prioritize, and act on high-potential leads efficiently. By leveraging AI through Salesforce Prompt Builder and Flows, the system automatically analyzes lead data, predicts the likelihood of conversion, assigns risk levels, and generates actionable alerts. This allows organizations to increase sales efficiency, focus on the most promising opportunities, reduce missed leads, and improve overall revenue performance, without requiring manual scoring or complex coding.

Milestone 1– Sign up for Dev Org

Salesforce is your customer success platform, designed to help you sell, service, market, analyze, and connect with your customers.

Salesforce has everything you need to run your business from anywhere. Using standard products and features, you can manage relationships with prospects and customers, collaborate and engage with employees and partners, and store your data securely in the cloud.

So what does that really mean? Well, before Salesforce, your contacts, emails, follow-up tasks, and prospective deals might have been organized something like this:

<https://youtu.be/r9EX3lGde5k>

Creating Developer Account

Creating a developer org in salesforce.

1. Go to <https://developer.salesforce.com/signup>
2. On the sign up form, enter the following details :

Build for the Agentic Enterprise. Sign up for your Developer Edition.

The entire Salesforce platform - exposed as APIs, MCP tools, and CLI commands. Build apps, ship agents, and let coding agents do the heavy lifting with Salesforce Headless 360.

- ✓ Build AI agents with Agentforce, grounded in your data with Data 360
- ✓ Connect Claude Code, Cursor, or Codex to your org with hosted MCP
- ✓ Build in the browser with the Agentforce Vibes IDE - no setup required
- ✓ Drag-and-drop when you want it, Apex when you need it
- ✓ 60+ MCP tools and 30+ coding skills, ready out of the box

Sign up for your Developer Edition

☒ I agree to the [Main Services Agreement – Developer Services](#), [Salesforce Program Agreement](#), and [API Terms of Service](#)

Your free trial may be provisioned on or migrated to Hyperforce, Salesforce's public cloud infrastructure.

I acknowledge, as described in the Developer Documentation: (1) the Developer Edition includes autonomous and other generative AI features; and (2) Salesforce may limit use features and the org, and may terminate any org that has been inactive for 45 days.

We value your privacy. To learn more, visit our [Privacy Statement](#).

1. First name & Last name

2. Email

3. Role : Developer

4. Company : College Name

5. County : India

6. Postal Code : pin code

Username : should be a combination of your name and company

This need not be an actual email id, you can give anything in the format :

username@organization.com

Click on sign me up after filling these.

Account Activation

1. Go to the inbox of the email that you used while signing up. Click on the verify account to activate your account. The email may take 5-10mins.

2. Click on Verify Account
3. Give a password and answer a security question and click on change password.

A screenshot of the 'Change Your Password' form in Salesforce. The form is titled 'Change Your Password' and asks to 'Enter a new password for lead@sb.com'. It lists requirements: 8 characters, 1 letter, and 1 number, all marked with green checkmarks. The form contains four main sections: 'New Password' with a 'Good' status, 'Confirm New Password' with a 'Match' status, 'Security Question' set to 'In what city were you born?', and 'Answer' set to 'asdfghjkl'. A red rectangle highlights the 'New Password', 'Confirm New Password', 'Answer', and 'Change Password' button. The 'Change Password' button is a blue button with white text.

Milestone 2 : Objects and Fields

What is meant by object ?

In Salesforce, an object is essentially a database table that stores a specific type of information for an organization. It serves as a structured container for data, analogous to a spreadsheet where:

- **Objects:** are like individual sheets or tables.
- **Fields:** are the columns within those tables, defining the specific attributes or pieces of information to be stored (e.g., "Name," "Email," "Phone Number").
- **Records:** are the rows within those tables, representing individual instances of the object (e.g., a specific "Account" record for "Acme Corp" or a "Contact" record for "John Doe").

1.Lead

Custom Fields Creation:

Field Label	API Name	Data Type
Lead Score	Lead_Score__c	Number
Lead Category	Lead_Category__c	Picklist(Hot, Warm, Cold)

Product Interest	Product_Interest__c	Picklist(Training, Consulting, Certification)
AI Summary	AI_Summary__c	Long Text Area

Creation of Custom Fields

Step 3.1 :Click the Gear Icon → Setup

Step 3.2 : Click on the Object Manager

Step 3.3 : From the object list, Select Standard Object name is Lead

Step 3.4 : In the Lead object left menu, click Fields & Relationships and after click the New button.

Step 3.5 : Select the data type as Number → click Next.

Step 3.6 :Fill the Text details:

- Field Label: Lead Score
- Length:20
- Click Next.

Step 6.7:Set Field-Level Security tick the Visible checkbox for profiles that should see the field (uncheck Read-Only if you want them to edit it). Then click Next. Step 6.8 : Click On The Save

Like this you need to create the remaining custom fields

Milestone 4 :Application Creation

A Salesforce application is a collection of tabs, objects, and tools grouped together to help users complete specific business processes. It provides a dedicated workspace where users can access all related data—such as accounts, contacts, opportunities, dashboards, or custom objects—without searching across the system. Applications can also be customized with logos, colors, and layouts to match an organization's branding while improving user experience and efficiency.

To create an application in Salesforce:

Setup → App Manager → New Lightning App → Enter App Details → Choose Branding → Add Navigation Items → Add Utility Items (optional) → Assign to Profiles → Save & Finish.

These steps guide you from opening the setup area to defining the app name, selecting tabs (objects), adding tools, choosing who can use the app, and finally making it available in the **App Launcher** for users.

Milestone 5: Tabs

A Tab in Salesforce is a clickable item that provides quick access to an object, page, or feature. Tabs help users navigate easily to important data such as custom objects, web pages, Visualforce pages, or Lightning components. Creating a custom tab is useful when you build a custom object and want users to access it directly from the navigation bar. Tabs improve visibility, organization, and accessibility within an app.

To create a tab in Salesforce:

Setup → Tabs → New → Select Object (e.g., Custom Object) → Choose Tab Style → Enter Description (optional) → Assign to Profiles → Save.

These steps allow you to add a new tab associated with an object, give it a visual icon, decide who can see it, and make it available for adding into apps through the App Manager.

Milestone 6: Creation Of Validation Rules

Activity 1: To create a Validation rule to Lead Object

Go to Setup → click on Object Manager → type Lead in the search bar → click on the Lead object.

1. Click on Validation Rules → click on New.
2. Enter the Rule Name as Reject_Personal_Email.
3. Check Active.
4. Insert the Error Condition Formula as:

```
OR(
  CONTAINS(Email, "@gmail."),
  CONTAINS(Email, "@yahoo."),
  CONTAINS(Email, "@hotmail."),
  CONTAINS(Email, "@outlook.")
)
```
5. Enter the Error Message as:

“Personal email domains like Gmail, Yahoo, Hotmail, and Outlook are not allowed.”

6. Select the Error Location as Email.

7. Click Save.

Milestone 7 – Profiles

A profile is a group/collection of settings and permissions that define what a user can do in salesforce. Profile controls “Object permissions, Field permissions, User permissions, Tab settings, App settings, Apex class access, Visualforce page access, Page layouts, Record Types, Login hours & Login IP ranges. You can define profiles by the user's job function. For example, System Administrator, Developer, Sales Representative.

Activity 1: Create Lead Manager Profile

1. Go to Setup → type Profiles in Quick Find → click Profiles.

2. Click Clone next to Standard User.

3. Enter:

- Profile Name: Lead Manager Profile
- 4. Click Save.
- 5. Edit the profile:
 - Under Object Settings, enable Read, Create, Edit, Delete access for:
 - Lead
 - Task
 - Event
 - Contact
 - Enable Modify All on Lead (optional based on requirement)
 - Ensure API Enabled is checked
- 6. Click Save.

Activity 2: Create Sales Agent Profile

1. Go to Setup → Profiles
2. Click Clone next to Standard User
3. Enter:
 - Profile Name: Sales Agent Profile
4. Click Save
5. Edit permissions:
 - For Lead → allow Read, Create, Edit
 - Remove Delete permissions
 - Allow access to: Task, Event
 - Ensure View Reports is enabled

6. Click Save

Milestone 8 – Roles

A role in Salesforce defines a user's record-level data visibility.

Roles control who can see whose records in the organization hierarchy.

Activity 1: Create Lead Manager Role

1. Go to Setup → type Roles in Quick Find → select Roles
2. Click Set Up Roles.
3. Click Add Role under the Sales Team hierarchy
4. Enter:
 - Role Name: Lead Manager
 - Role Label: Lead Manager
 - Parent Role: VP of Sales (or any upper-level role)
5. Click Save

Activity 2: Create Sales Agent Role

1. Go to Setup → Roles → Set Up Roles
2. Click Add Role under Lead Manager
3. Enter:
 - Role Name: Sales Agent
 - Parent Role: Lead Manager
4. Click Save

Milestone 9 – Users

Activity 1: Create Lead Manager User

1. Go to Setup → Users → New User

2. Fill in:

- First Name: Lead
- Last Name: Manager
- Alias: lead
- Email: your personal email
- Username: (salesagent@test.com)
- Nickname: leadmanager
- Role: Lead Manager
- User License: Salesforce
- Profile: Lead Manager Profile

3. Click Save

4: Once Log out and login with the new username and check gmail by clicking on forgot password and generate a new password.

Activity 2: Create Sales Agent User

1. Go to Setup → Users → New User

2.Fill in:

First Name: Sales

- Last Name: Agent
- Alias: sales
- Email: (your personal email)
- Username: (salesagent@test.com)
- Nickname: salesagent
- Role: Sales Agent
- User License: Salesforce
- Profile: Sales Agent Profile

Click Save.

Milestone 10:Flows

10.1 Steps to Create the Record-Triggered Flow

1. From Setup, in the Quick Find box, search for Flows.
2. Click New Flow.
3. Select Category: Triggered.
4. Select Type: Record-Triggered Flow.
5. Configure the Start Element:
 - **Object: Lead**
 - Trigger: A record is created or updated
 - Entry Condition Requirements: (example based on common lead email use cases—adjust to match your flow)

- Optimize the Flow For:
Actions and Related Records
- When to Run the Flow: Run Immediately

6. Click Done.

7. Add the Email Action

Add the Send Email Action

6.1 Click the + icon below the Start element.

6.2 Select Action.

6.3 In the Action search bar, type:

Send Email

6.4 Select: Send Email

6.5 Configure the action fields:

- Label: Send Lead Email
- Subject: (enter your email subject)
- Body: {{!\$[Record.Name](#)}}
- {{\$Record.AI_Summary__c}}
- Recipient Addresses: (enter email formula or field reference; e.g., {{\$Record.Email}})
- Sender Type: Org-Wide Email or Default

- Is HTML Body: True
- RecordId → {!\$Record.Id} (if included in your setup)

Click Done and Activate.

The image shows two screenshots from the Salesforce Flow Builder interface.

The top screenshot is the "New Automation" screen. It features a "Let Einstein Help You Build" section with a "Get Started" button. Below this are four categories of automations: Triggered Automations, Scheduled Automations, Screen Automations, and Autolaunched Automations. Under the "Frequently Used" section, the "Record-Triggered Flow" is highlighted with a red box. It is described as launching when a record is created, updated, or deleted, and running in the background.

The bottom screenshot shows the "Flow Builder" interface for a flow named "Lead Record with RTF - V2". The flow is in the "Debug" state, and the "Send Email" action is selected. The "Send Email" action configuration panel is open, showing the following details:

- Label:** Send Lead Email
- API Name:** Send_Lead_Email
- Description:** (Empty text area)
- Set Input Values:**
 - Configure Recipient Details:**
 - Recipient Addresses:** A search bar with the text "Enter value or search resources...". Below it, a tag labeled "Triggering Lead > Email" is visible.
 - CC Addresses:** A search bar with the text "Enter value or search resources...".

The flow canvas shows a "Record-Triggered Flow" trigger leading to a "Run Immediately" action, which then leads to the "Send Email" action.

Milestone 11: Agentforce, Reporting & Deployment

Activity 1 : Create Prompt Template

1. click the Gear Icon → Select Setup.
2. In the Quick Find box, search Einstein Setup.
3. Click Einstein Setup.
4. Enable Turn on Einstein.

Refresh the page after enabling Einstein.

Prerequisite: Create AI_Summary__c Field

Before selecting the field in Prompt Builder, you must create the AI Summary Custom field in the Lead Standard Object.

Steps:

1. Click Gear Icon → Setup.
2. In Quick Find, search Object Manager.
3. Select Lead
4. Click Fields & Relationships → New.
5. Select Long Text Area → Click Next.
6. Field Label: AI Summary
API Name auto-populates as AI_Summary_c
7. Set Length = 32000 and Visible Lines = 5–10.
8. Click Next → Save.

Step 2: Open Prompt Builder

1. In the Quick Find box, search Prompt Builder.
2. Click Prompt Builder.
3. Click New Prompt Template.

Step 3: Select Prompt Type

1. Choose Field Generation.

New Prompt Template

About
Select a prompt template type. The template type determines which data sources you can use in your prompts. [Learn more in Help.](#)

* Prompt Template Type ⓘ

- Anomaly Analysis
- Einstein AI-Generated Search Answers

Cancel Next

5.Click Next

Step 5: Insert Resources

- Full Name: {!Lead.Name}
- Company: {!Lead.Company}
- Email: {!Lead.Email}
- Phone: {!Lead.Phone}
- Lead Source: {!Lead.LeadSource}
- Lead Status: {!Lead.Status} - Description: {!Lead.Description}

Step 6: Enter Sample Prompt

Write the below prompt:

Generate a detailed summary of this Lead using the selected fields.

Explain the Lead's background, company information, contact details, status, source, and any key notes clearly.

Summarize relevant details such as the current engagement stage, potential interest level, communication history, and any important remarks.

Provide the summary in a clean, structured, and easy-to-understand format.

Step 7: Save and Activate

1. Click Save.

2. Click Activate.

Your Prompt Template is now ready.

Activity 2 : Deploy Prompt Builder in Visa Application Object Using Lightning App Builder.

Step 1: Open Any Record

1. Click the App Launcher (9 dots).
2. Search for Lead Object
3. Open any existing Student Record.

Step 2: Edit Lightning Page

1. Click the Gear Icon → Select Edit Page.

The screenshot displays the Salesforce Lightning App interface for a lead record titled "Ms. Minu Antony". The main content area shows the "System Information" and "Description Information" sections. The "System Information" section includes fields for "Created By" (VIGNESH DUDHIGAMA, 2/2/2026, 9:01 PM) and "Last Modified By" (VIGNESH DUDHIGAMA, 2/2/2026, 9:01 PM). The "Description Information" section includes a "Description" field and an "AI Summary" field. The "AI Summary" field is currently empty and has a blue "Use" button next to it. The "Einstein - AI Summary Field" sidebar is open on the right, showing a warning message: "This tool uses generative AI which can produce inaccurate or harmful responses. Learn More". Below the warning, there are instructions on how to use the tool: "Need help filling out the details? Einstein helps you fill out generative AI-enabled fields. Click any generative AI-enabled icon to create field values. Not perfect? Tell Einstein how to fix it using natural language like, 'Make it shorter.'" and "Here is what I came up with". The sidebar also displays a sample AI-generated summary for a lead associated with SmartBridge, including the contact email "vigneshdudhigama@gmail.com" and the current status "Working - Contacted". At the bottom of the sidebar, there is a "Describe your task or ask a question..." input field.

Step 3: Upgrade to Dynamic Detail Page

1. Click the Detail Page.
2. Click Upgrade Now.

1. Click Next.
2. Select the Lead Object Layout.
3. Click Finish.

Step 4: Assign the Prompt Template to the Field

1. Click the AI_Summary_c field on the layout.
2. In the right-side panel, search Prompt Template.
1. Select your template: AI Summary Field Generation Field

Step 5: Save & Activate the Page

1. Click Save.
2. Click Activate.
3. Select Assign as Org Default.
4. Choose Desktop and Phone.
5. Click Next.
6. Click Save.
7. Click Back.

Activity 3 : Testing to Lead object Record

1. Click the AI (Stars) icon located at the end of the AI Summary field.
2. The Prompt Builder generates the AI Summary based on the lead details and populates the AI Summary field automatically.

Here is what I came up with

Dhudhigama Gan is a lead associated with Smart8ridge. The contact email for this lead is vigneshdudhigama@gmail.com. The current status of the lead is "Working - Contacted." Further details regarding the lead's requirements or description were not provided.

Use

Describe your task or ask a question...

Cancel Save

4. Click Save.

The screenshot shows the Salesforce interface for a Lead record titled "Ms. Minu Antony". The "Leads" tab is selected in the top navigation bar. The record details are as follows:

- System Information:**
 - Created By: VIGNESH DUDHIGAMA, 2/2/2026, 9:01 PM
 - Last Modified By: VIGNESH DUDHIGAMA, 2/2/2026, 9:01 PM
- Description Information:**
 - Description: (Empty text area)
 - AI Summary: Dudhigama Gan is a lead associated with SmartBridge. The contact email for this lead is vigneshdoodigama@gmail.com. The current status of the lead is "Working - Contacted". Further details regarding the lead's requirements or description were not provided.

At the bottom of the record, there are "Cancel" and "Save" buttons. On the right side, the "Einstein - AI Summary Field" panel is open, displaying the AI-generated summary and a "Describe your task or ask a question..." input field.

5. Output.

The screenshot shows the Salesforce interface for the same Lead record, "Ms. Minu Antony", but with updated information. The "Leads" tab is still selected. The record details are as follows:

- Product Interest:** (Empty text area)
- SIC Code:** (Empty text area)
- Number of Locations:** (Empty text area)
- Current Generator(s):** Primary
- System Information:**
 - Created By: VIGNESH DUDHIGAMA, 2/2/2026, 9:01 PM
 - Last Modified By: VIGNESH DUDHIGAMA, 2/8/2026, 11:03 PM
- Description Information:**
 - Description: (Empty text area)
 - AI Summary: Ms. Minu Antony is a lead associated with SmartBridge. The contact email for this lead is vigneshdoodigama@gmail.com. The current status of the lead is "Working - Contacted". Further details regarding the lead's requirements or description were not provided.

At the top right of the record, there are buttons for "+ Follow", "New Case", "New Note", and "Submit for Approval". The right side of the interface is currently blank.
