

Solution Requirements

Developed by – Minu Antony

Overview

This document defines the solution requirements for the AI-Powered Lead Generation System built using Salesforce Agentforce.

Functional Requirements

- Lead Management
- AI Lead Scoring
- AI Summary Generation
- Reports & Dashboards
- Flow Automation
- User Authentication

Non-Functional Requirements

- Security
- Scalability
- Performance
- Reliability
- Usability

Expected Outcome

The solution automates lead qualification, improves productivity, and supports data-driven sales decisions.
