

# User Acceptance Testing (UAT) Report

## Project: AI-Powered Lead Generation System

Developed by: Minu Antony

### 1. Introduction

This report presents the User Acceptance Testing (UAT) conducted for the AI-Powered Lead Generation System. The objective is to ensure the application satisfies business requirements and is ready for end users.

### 2. Objectives

Validate business requirements, verify AI lead scoring, confirm AI summary generation, ensure workflow automation, and verify dashboard functionality.

### 3. Test Environment

Platform: Salesforce Developer Edition

AI: Agentforce

Automation: Flow Builder & Prompt Builder

Browser: Google Chrome / Microsoft Edge

### 4. User Feedback

Users confirmed that the application is intuitive, AI-generated summaries are useful, and workflow automation improves productivity.

### 5. Conclusion

The application successfully passed User Acceptance Testing. All critical business requirements were satisfied, and the solution is ready for deployment.

| Test Case              | Expected Result             | Status |
|------------------------|-----------------------------|--------|
| Lead Creation          | Lead created successfully   | Pass   |
| AI Lead Scoring        | AI score generated          | Pass   |
| AI Summary             | Summary generated           | Pass   |
| Flow Automation        | Workflow executed           | Pass   |
| Email Notification     | Notification delivered      | Pass   |
| Dashboard Verification | Reports displayed correctly | Pass   |
